“If it’s at sea, we do it”

A message from the CEO

“If it’s at sea, we do it!”

From the word itself, the basic principle of Marine Works a department of Al Dar Marine, focuses and specialize in Marine services. Which offers dynamic development in terms of Marine Industries.

Marine Works a department Al Dar Marine, offers all kinds of services and complete solution in related to marine, such as Safety Security Sea Barrier, Gangway, Pontoons, Beach Rehabilitation, Marine Construction and Etc.

To fully understand Marine Works, I am proud to introduce ourself initially through this brochure and to showcase what Marine Works of Al Dar Marine are made of.

A handwritten signature in black ink, appearing to be 'Jaber Al Rumaihi'.

Sincerly,
Jaber Al Rumaihi
CEO / President / Sponsor

DOHA PORT REDEVELOPMENT PROJECT

Projects Manager

- Engr. Lahouel Anis

Al Dar Marine operates in the State of Qatar as a general Marine Contractor. Our Overall objective is clear and ambitious: We strive to retain our position as the leading marine works company, and to be a preferred partner in ports construction projects, artificial beaches and all kind of floating facilities.

We share a passion for entrepreneurship and marine construction. We design and execute innovative maritime solutions based on Marine ingenuity, creating value for our clients.

We always maintain high standards of quality, safety and integrity on our projects. We are prepared to take responsibility and we care about creating a sustainable world.

BEACH NOURISHMENT AND LEVELING OPERATIONS

COMPANY PROFILE

ABOUT US

AL DAR MARINE provides specialist marine contracting and coastal protection services to developers, contractors, operators and government in the state of Qatar. Offering a complete turnkey solution, AL DAR MARINE 's services cover the full life cycle of a marine or coastal project from development and protection, marine infrastructure, to operation and maintenance. AL DAR MARINE uses its coastal and marine expertise to fully understand each unique marine environment, and its practical experience to design and construct a holistic solution, best suited to the environment and its specific clients' needs.

OUR VISION

The growing of Qatari population needs more space. The demand for energy is rising constantly and society is demanding a transition to a renewable energy system. Increasing world trade requires more and better port facilities and climate change is threatening coastal areas.

OUR MISSION

We are a marine contractor specializing in marine engineering and submarine projects. We work closely with our clients to create innovative, sustainable solutions and safe working conditions

If it's at sea, we do it

OUR AREAS OF EXPERTISE

DOCKING PONTOON SYSTEMS SUPPLY AND INSTALLATION

We offer and install the Marine Docking pontoon systems. Marine floating dock systems apply to all kinds of industrial marine productions, from boats up to mega yachts and passenger ferries.

- With its product range, it responds to the needs of the following:

- Specialty contractors (Marina and private property marina)
- Navy, Customs and Coast Guards (Docking for the patrol and landing craft)
- Professional (Pontoons for ferries, trawling, aquaculture facilities)
- Sports and recreation facilities (rowing pontoons and swimming platforms)

SEAFLEX MOORING SYSTEM

SEAWALK WAY

MARINE INFRESTRUCTURE AND COASTAL PROTECTION

- Coastal management and protection strategies
- Survey and modeling
- Groynes, breakwaters and revetments
- Dredging and beach nourishment
- Beach construction, improvement and protection
- Marine floating barriers

MARINE RECREATION & LEISURE FACILITIES

- Marinas & berthing facilities
- Marine piling
- Artificial reefs and dive paths
- Navigation channels and markers
- Security barriers.

MARINE INFRASTRUCTURE

ALDARMARINE covers the full spectrum of design and construction of marine facilities from marinas and jetties, quay walls, to piling for overwater restaurants and villas, to creation of artificial reefs.

- Marinas, pontoons & jetties
- Boardwalks & over-water facilities
- Quay walls
- Slipways & berthing facilities
- Marine piling
- Dredging and reclamation works

SEABED EXCAVATION WORKS

OUR AREAS OF EXPERTISE

BEACH NOURISHMENT

COASTAL PROTECTION

Al Dar Marine is specialized on the design and built of artificial beaches . We take an engineered, solutions-based approach to our clients' coastal problems. Using coastal modeling and survey to understand the root of the problem, we design a solution best suited to each unique coastal environment and our clients' needs.

Our coastal protection and improvement works involve the design and construction of:

- Breakwaters
- Groynes
- Ecologic barriers
- Artificial Reefs
- Beach Nourishment

BEACH NOURISHMENT

OUR AREAS OF EXPERTISE

MARINE PILING WORKS

Al Dar Marine provide marine piling works which are mostly carried out in construction of various marine structures like

- Seawalk Ways
- Harbours
- Jetties.

SEAWALK WAY

MARINAS AND BIRTHING FACILITIES

OUR AREAS OF EXPERTISE

SEAFRONT LIFE STYLE SOLUTIONS FOR PRIVATE VILLAS

AL DAR MARINE is specialized in the design, construction and maintenance of floating solutions for marinas and harbours, complete with all necessary facilities. A wide range of flexible and modular floating equipment is available with specific characteristics for each application and location.

The experience gained over more than 20 years of activity, a highly specialized technical staff, and a close collaboration with customers and suppliers, make Lindley a company with unique characteristics, offering a wide and flexible range of solutions.

SUBMARINE WORKS

Al Dar Marine under take all types of under water works like:

- Underwater cutting and welding
- Underwater ships repair
- Pipe laying
- Hull cleaning
- Excavation
- Anchoring systems installation
- Underwater video inspection and survey

DESIGN, MODELING AND MONITORING

Al Dar Marine provide optimized technical solutions for all type of marine projects, we design projects, undertake modeling and conduct monitoring.

We collaborate with internationally renowned consultants to develop project studies in the various marine engineering disciplines.

UNDER WATER HULL CLEANING

SAFETY COMMITMENT

Think safe and work safe, Safety is always at the heart of everything we do, no matter where our work takes us.

Safeguarding life is our license to operate on the global market. The downward trend in accidents continues. We owe this to our proactive safety culture and training.

Our employees actively contribute to health and safety guided by the motivation and support of our management.

FLOATING MARINE SPORTS FACILITIES

OUR AREAS OF EXPERTISE

FLOATING MARINE SPORTS FACILITIES

Al Dar Marine provides modular floating structures customize as per client needs. It cover floating docks for:

- Jetski
- Kayak
- Jetboat
- Motorboat

SEAFRONT LIFE STYLE SOLUTIONS FOR PRIVATE VILLAS

AL DAR MARINE are in partners with a lot of reliable suppliers which supplies with state of the art and a high quality standard products such as the following details:

- Floating breakwaters
- Concrete floating pontoons
- Steel, aluminium and timber floating pontoons
- Pontoon access bridges and gates
- Floating platforms for parking jetskis and small boats
- Marina service pedestal (electricity, lighting and water service)
- Jetski Parkings and Boat Lifts

NAVIGATION BUOYS

AL DAR MARINE supply and install all types of marine navigation buoys in accordance with IALA standards manufactured by PMS Turkey.

Al Dar Marine provides the latest generation of navigation buoys mainly made of PEHD which allow more durability and less maintenance operations.

Al Dar Marine provide annual maintenance services and on-time monitoring for the whole navigation system of ports.

If it's at sea,
we do it

Marine Environmental Consultancy

- Dr. Slim Gana

Importance of Marine Environmental Consultancy

Prior to undertake any marine protection or construction works, in the coastal or offshore zone, it is mandatory to assess the oceanographic and environmental conditions in order to design the project components accordingly, in compliance with environmental regulations and to ensure the sustainability of the investment.

Our Services

In that vision, Al Dar Marine offers an integrated approach including Bathymetry, Seabed Mapping, identification of underwater obstructions and features, Environmental Baseline Studies, Historical Meteocean Studies to assess the extreme events, monitoring of currents tides and waves, monitoring of water quality and a large range of site surveys according to clients and projects needs.

Our Vision

Al Dar Marine is at the disposal of their clients to define with them what are the site survey elements that are required to fully master the interactions of the marine parameters with the project components, with a view to optimize natural, financial and human resources, in compliance with quality, safety and state-of-the-art standards .

Marine Environmental Services

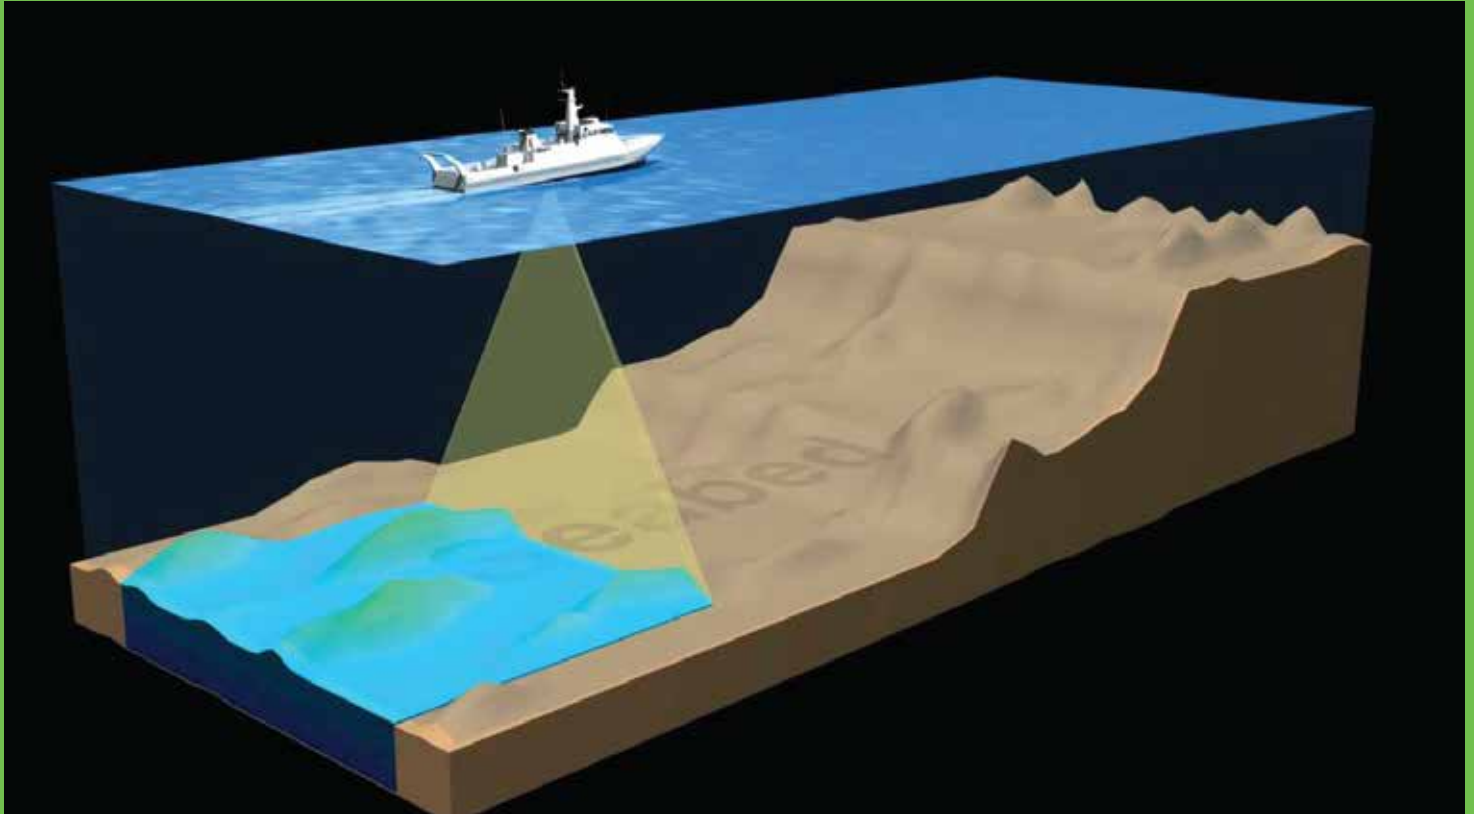

Al Dar Marine covers the whole spectrum of marine environmental services:

- Bathymetric Survey
- Seabed Sampling and Analysis
- Seawater Sampling and Analysis
- Underwater Video expertise of marine structures
- All kinds of pre-works and post-works marine environmental studies
- GIS chart production and data management

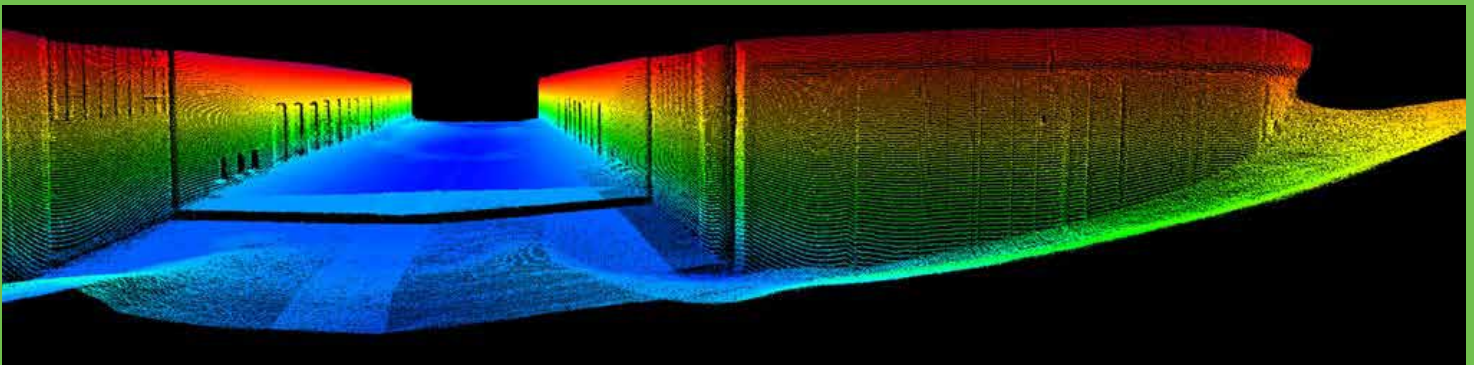

Seabed Sampling

Marine Environmental Services
